DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over the Colonial Pipeline Company website pages including sections entitled “Terminalling Services,” “About Us,” and “System Map.” Colonial Pipeline Company discloses a petroleum distribution system that includes supply lines below the ground surface, such supply lines include pumping stations i.e. terminals. The system map shows the distribution system passing through several states and it would be inherent that should the pipeline system need to pass or parallel an interstate highway, that proper “permission” is acquired. The claims also do not specify a specific length of pipeline. Therefore, with the length of underground pipe and all of the interstates traversing the U.S., the pipeline would definitely extend below and immediately adjacent the highways for at least some undetermined finite length. In the alternative, it would have been obvious to one of ordinary skill in the art to place a pipeline under the median of a highway, since doing would facilitate laying out of the pipeline from a “point a” to a “point b”, for example. As to the product being electricity, it would have been obvious to one of ordinary skill in the art to provide an electricity as an energy product, since the use of electricity is well known and lines for electricity are known to be provided underground for fiber optics and telecommunications for example.

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Frederick L. Lagman whose telephone number is 703-305-7456. The examiner can normally be reached on Monday-Friday 9:00am to 5:30pm.
